What is in air?

Let these sample questions help you start thinking about what you might ask a local air expert to learn more about the air you breathe.

Find out more about the expert:

Did you always know you would work in a field related to air/weather etc?

What is your background or what was your area of study in school?

Have you had other jobs that were also related to air/weather etc?

Learn more about what is in air:

What is in the air?

Do the different atoms and molecules in the air ever change?

What are in the different layers of the atmosphere?

Learn more about the impact air has on life and weather:

How does the quality of air affect humans, wildlife, and vegetation?

Does the air have an impact on weather- such as how much it will rain?

Does air change with the seasons?
