

# Prepare To Meet An Expert

[www.groundwater.org](http://www.groundwater.org)

Meet an expert and learn about how water is transported from its source to your home and throughout your community.

Think about what questions you have to ask the expert about the water provided to you and your community? Review the sample questions and prepare some questions of your own!

## Sample Questions:

How far does water travel from its source to reach homes in our community?

How is the water transported from the source to homes or businesses?

How much energy does it take to supply the water used each day?

Will energy be conserved if less water is used?

If there is a power outage will water still be able to get to my home?

Write your own questions.
